N.B.: gemeten met een automatische regenmeter. Deze meet op jaarbasis enkele tientallen mm te weinig.

Neerslaghoeveelheid per maand (mm)
Achtergrondkleur: neerslagoverschot / -tekort

-50 0 50 100 150

heel droog vrij droog vrij nat nat heel nat extreem nat

Droogte Top 3
(rangorde per dag)

1e ■
2e ■
3e ■

Op basis van neerslag- en verdampingsgegevens van het KNMI. Verdampingsgegevens volgens Makkink. Berekening neerslagoverschot wijkt af van het KNMI.
Berekening: Neerslagoverschot = neerslagoverschot van de dag + neerslagoverschot voorgaande dagen x 0.875 LogboekWeer.nl
